PROFILE

Computer Science student at Tanta University with a strong passion for Front-End Development and building modern, user-friendly web applications. Skilled in HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, and responsive web design, with hands-on experience through internships and training programs. Passionate about creating clean, interactive, and visually appealing user interfaces while following modern UI/UX principles and clean code practices. A fast learner with strong problem-solving abilities, teamwork skills, and a continuous desire to grow as a professional Front-End Developer. Currently seeking an internship or junior opportunity to contribute, gain industry experience, and further enhance technical expertise.

PROJECTS

S & M Store | E-Commerce Web Application 🔗

09/2026 – 09/2026

Developed a modern, fully responsive e-commerce website using React.js, Next.js, JavaScript, and Tailwind CSS, featuring product browsing, categories, product details, and shopping cart functionality with a clean and user-friendly UI.

Landio– Modern Responsive Web Interface 🔗

01/2026 – 02/2026

Landio is a responsive and interactive website with a clean, user-friendly UI. It allows users to easily browse and explore furniture products on desktop, tablet, or mobile. Designed for simplicity and smooth navigation, it combines aesthetic design with practical functionality for an engaging online shopping experience.

My Website 🔗

01/2026 – 02/2026

Personal Portfolio Website (HTML / CSS / JavaScript) Developed a fully responsive personal website from scratch using HTML5, CSS3, and JavaScript ES6 to showcase my work and skills. Implemented a mobile-first design approach with Flexbox, CSS Grid, and media queries to ensure seamless responsiveness across all devices (mobile, tablet, desktop). Added interactive UI elements (e.g., mobile navigation menu, dynamic content tabs, scroll effects) using vanilla JavaScript to enhance user experience. The website is cross-browser compatible and optimized for performance and accessibility.

Axis – Responsive Frontend Project 🔗

02/2026 – 3–2026

Built a complete responsive website "Axis" from scratch using **HTML, CSS, Bootstrap, and JavaScript**. Implemented responsive navigation, clean UI components, and interactive elements. The project demonstrates strong frontend fundamentals, cross-device compatibility, and attention to modern web design standards.
